

Jade 30

The Jade 30 is a modern, three-way floor-standing speaker designed with a vintage aesthetic.

The construction features a large, custom-designed 15-inch woofer with a classic paper cone and a powerful magnetic system, ensuring sound with tremendous scale and dynamics, reaching the lowest registers unattainable by smaller designs. The proprietary midrange driver, like the woofer, utilizes a paper cone and is equipped with a precisely designed phase corrector in the form of an aluminum cylinder with specific geometry. The absence of a dust cap in this driver results in a clean midrange, free from coloration and resonances.

A BMS compression tweeter driver, working in a custom-designed short horn with a Tractrix profile, allows for precise and detailed high frequencies without the harshness commonly associated with horn-loaded speakers. Thanks to the careful selection of drivers and their parameters, we achieved relatively high efficiency with an easy 8-ohm impedance.

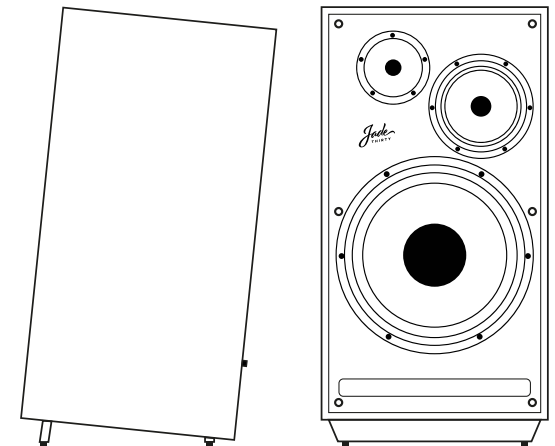

The uncompromising crossover, made from linear components and foil capacitors, enables maximum fidelity and naturalness of sound reproduction. The enclosures, finished in natural American walnut veneer, are constructed from thick MDF boards with additional bracing and reinforcements in key areas, ensuring structural rigidity. A slight tilt of the speaker, achieved through the use of specially profiled feet, focuses the sound wave at the listener's ears. The set also includes a vintage-style grille with classic peg mounts.

The Jade 30 combines "powerful sound" with unrestricted musical freedom and the scale of an instrument, delivering truly concert-like experiences. The system offers immense sound reinforcement capabilities while creating a full-scale background during quiet listening sessions, unmatched by smaller speakers.

Jade THIRTY

 Frequency response	32 Hz - 20 kHz
 Impedance	8 Ohm
 Efficiency	93 dB
 Max power	350 W
 Nominal power	200 W
 Weight	55 kg / piece
 Dimensions (W/H/D mm)	480 / 934 / 460
 Finish	wax coated natural american walnut veneer
